

Should you go solar in San Diego?

Solar energy offers a renewable, eco-friendly and cost-effective way to power your property. If you're from the San Diego metro area and are considering going solar, it's important to do your research beforehand and understand basic costs for solar in your area.

How much does solar cost in San Diego?

The average price of solar is about \$2.14 to \$3.22 per watt in San Diego, so anything in that range is a fair price. Some prices may be too good to be true. If your installer quotes you way below the average price in your area, proceed with caution. Installers must charge fair prices to remain in business and provide you with 25 years of support.

How many solar companies are there in San Diego?

With 210 solar companies in the area and the median San Diego household size as 1,801 square feet, you should get a basic idea of how many options are at your disposal and what size solar system you'll need for your home. Below are a handful of other important aspects of choosing a solar installation company in the San Diego metro area.
