Solar driven LED street lighting provides high-quality, cost-efficient lighting using sunlight instead of conventional electricity. During the day a solar panel converts solar energy into electrical energy that is stored in a battery. When night falls, the battery discharges, releasing enough power for the LED luminaire to light the road.

street lights powered by solar and wind energy in china. video courtesy wade shepard / vagabond journey. china will invest more in solar and wind energy to encourage sustainable development.
