And as mentioned above, the average three-bedroom household with a 3.5kWp solar panel system should usually look for a 5-6kWh solar battery. If there's any possibility that you'll increase your electricity consumption in the future, you should also ask whether your battery is stackable - which would allow you to easily add more modules at some point.

It supports advanced features such as Time-of-Use (TOU) mode and dynamic electricity pricing, allowing homeowners to optimize energy usage based on real-time rates. This intelligent system helps maximize energy savings, reduce electricity costs, and ensure efficient energy management.
