

Should you clean your solar panels?

There is no doubt that cleaning your panels will increase their overall efficiency. According to many statistical observations, this efficiency and performance improvement can be dramatic, up to 21% in residential arrays and up to 60% in commercial installations. So it's the best way to ensure that your panels are prepped for maximum efficiency.

How often should you clean solar panels?

Solar experts strongly suggest solar panels cleaning twice a year. However, if you find that the panels get dusty instantly, you might need to clean solar panels more often. Having a solar system installed requires you to perform regular cleaning and maintenance to ensure satisfying performance and extend their longevity.

How do I clean my solar panels?

When cleaning, treat your solar panels like you would a pair of glasses. Debris is temporary and can be carefully removed, but a scratch is permanent. If you do clean your panels, here are some things to keep in mind: Use water only, unless you have hard-to-remove debris on your panels, such as bird droppings. Use a simple garden hose.

Should I hire a solar panel cleaning service?

Again, the answer is probably not. If cleaning is advised, it will be less expensive to do it yourself rather than hire a solar panel cleaning service. On the other hand, if your garden hose isn't powerful enough to reach your rooftop panels from the ground and you don't want to climb onto the roof, hire a professional to do it for you.

Do solar panels need maintenance?

Nobody wants an aged-looking, dirt-covered panel adorning their rooftop. Similar to how important it is to clean the rest of your home, it is also essential to take proper care of your solar panels and clean them regularly. This kind of proper maintenance will make your home more aesthetically appealing to both you and your visitors. 6. Inspection

Do solar panels need to be cleaned if it rains?

Similar to how you need to clean your car's windshield more often during the rainy season, your solar panels need to be cleaned more often as well. So, it is recommended that you don't rely on rain water to clean your panels automatically, because it just doesn't happen.
