

What are portable solar panels & solar battery chargers?

Portable solar panels and solar battery chargers are easy-to-use devices that provide backup power to anyone who happens to be away from a working power outlet, including hikers, car campers, and even people looking to keep their devices running during a power outage at home.

What is a portable solar charger used for?

Portable solar chargers are best used to power small electrical items, such as smartphones and portable battery packs. They can be perfect for topping up the batteries of devices you might take on a camping trip, but generally aren't much help when it comes to feeding more power-hungry products, such as televisions, portable fridges and kettles.

Are portable solar chargers a good idea?

Portable solar chargers don't have this problem, and as long as the proper conditions are met, they can provide a practically unlimited supply of electricity for your mobile devices, flashlights and battery packs or portable chargers. Compact and lightweight, they're perfect for camping, travel and emergency use.

How much does a portable solar charger cost?

Specifically for this buyer's guide, we conducted online research and identified over a dozen portable solar chargers ranging in price from \$30 to \$649. After careful consideration, we narrowed down the candidates to a handful that we tested in real-world conditions.

What is a solar power charger?

There's a lot to understand about solar power chargers, but at their heart, a small solar panel consists of several photovoltaic cells grouped together to absorb some of the sun's energy and convert it into an electric charge that you can use to charge electronics.

Which solar charger should I buy?

The Goal Zero Nomad 2 has everything you might need in a solar charger: high wattage, an abundance of USB ports and a business-like folding design and the leading monocrystalline panel type. For mains-style power output on demand, the EcoFlow portable power station and 220W panel is highly recommended.
