Suriname Energy Storage Registration Process

Power generation capacity expansion is regulated by the Energy Authority of Suriname (EAS), through the electricity law (issued by the government in 2016). It only allows public entities like the EBS and the State Oil Company of Suriname to invest in major capacity expansion (hydro and thermal power).

The EAS performs supervisory and steering tasks and duties aimed at establishing and promoting optimal availability, affordability and sustainability in the energy sector of Suriname. Furthermore, the EAS derives its duties and ...

Learn about the essential steps for registering a business in Suriname, including necessary documentation, types of business structures, and navigating government regulations. This comprehensive guide outlines the business registration process, key government agencies involved, and common challenges faced by entrepreneurs. Additionally ...

Suriname's oil and gas sector is taking off at a dynamic time for the global energy industry, with a worldwide energy transition and wars in Ukraine and the Middle East hampering supply.

Developments such as smart grids, energy storage solutions, and the digitization of energy management are revolutionizing how energy is generated, distributed, and consumed. A smart meter, for instance, can accurately monitor energy consumption for households or businesses, providing insights into where and when energy waste occurs.

Power generation capacity expansion is regulated by the Energy Authority of Suriname (EAS), through the electricity law (issued by the government in 2016). It only allows public entities like the EBS and the State Oil Company of ...
