

Swaziland Intelligent Capacitor Compensation Device

Technical specification of intelligent capacitor module for . low-voltage reactive power compensation.
T/CPSS 1003--2024. ICS:01.040.29. CCS:K 46.
:??? ...

NA series intelligent integrated harmonic suppression power capacitor compensation device is based on two (-type) or one (Y-type) low-voltage power capacitors as the main body, using microelectronics software and hardware technology, micro sensor technology, micro network technology and electrical manufacturing Technology and other new ...

Intelligent Capacitor Solutions ... Reactive Power Compensation Capacitor Specifications 7 AMP0 Low Voltage (Three-phase and single-phase) (up to 600 VAC) MMP0 Low Voltage (Three-phase and single-phase) (up to 600 VAC) MMP0 Low Voltage (Three-phase and single-phase) (750 to 900 VAC) MMP0 Medium Voltage (Three-phase and single-phase) (1040 to 4800 VAC) EPFC ...

The CDCE3 series low-voltage intelligent capacitor compensation device is a new type of compensation device that uses self-healing low-voltage power capacitors as the main body, intelligent measurement and control processors as the control center, and microelectronic software and hardware technology to compensate for reactive power of 0.4kV low ...

Capacitor compensation cabinets can reduce reactive current in the power system. These reactive currents are exchanged back and forth between the power source and the load, occupying the capacity of the power grid and reducing the power supply capacity of the power supply equipment. By compensating for reactive current, the overall power factor is ...

This series of integrated intelligent power capacitors is a safe, reliable, high-efficiency and energy-saving installation installed in the reactive power compensation device. Its function is to reduce the transformer loss, the line loss of the power supply line, improve the power factor of the power system and improve the grid power The core ...

??? ,????????????????
??? ,????????? ???? ...

The invention relates to the technical field of power capacitance compensation, in particular to an intelligent integrated power capacitance compensation device, which comprises a...

This series of integrated intelligent power capacitors is a safe, reliable, high-efficiency and energy-saving

installation installed in the reactive power compensation device. Its function is to reduce ...

The utility model is related to a kind of intelligent capacitor compensation devices, including metal shell, it is provided with intelligent controller and miniature circuit breaker on the...

NA series intelligent integrated harmonic suppression power capacitor compensation device is based on two (-type) or one (Y-type) low-voltage power capacitors as the main body, using microelectronics software and hardware ...

HY series intelligent combined anti-harmonic low voltage power capacitor is a new integrated module for reactive power compensation. which is applied in 0.4kV low voltage distribution network to save energy, harmonic mitigation ...

????????????400 V?????50 Hz????????????????? ?????: ?????????????,????,????????????, ...

The CDCE3 series low-voltage intelligent capacitor compensation device is a new type of compensation device that uses self-healing low-voltage power capacitors as the main body, intelligent measurement and control processors as the ...

SWCP intelligent reactive power compensation monitoring device is a protection device suitable for parallel capacitor devices of 35kV and below voltage systems. It has the characteristics of high measurement accuracy, accurate and reliable fault analysis, complete protection functions, and intuitive parameter display. It can collect voltage, temperature and humidity of the system ...

AZC series intelligent capacitor is a new generation of reactive power compensation equipment which is applied to 0.4kV, 50Hz low voltage power distribution to save energy, reduce line ...
