

The correct way to install the battery assembly

How do I install a new battery?

Clean the battery tray: Before installing a new battery, clean the battery tray and remove any corrosion or residue. Rinse with clean water and dry thoroughly. When installing a new battery or reconnecting the old one, reverse the steps from above and connect the positive terminal first, followed by the negative terminal.

How do I insert a battery?

When you insert batteries, just match the negative end to the spring and the positive end to the flat side. In this case, you'll place the negative, flat sides of the batteries against the springs. Include your email address to get a message when this question is answered.

How do you replace a battery?

Secure the new battery to the bracket and grease the terminals. Place the new battery in the battery tray and secure it to the bracket. Simply reverse the process you used to remove the battery from the bracket. Then, coat each of the terminals in a thin layer of lithium grease to prevent corrosion.

How do you put a new battery in a laptop?

If you're ready to pop in those fresh batteries, read on! For AA, AAA, C, and D batteries, slide the flat, negative end of the battery against the spring onto the device. Then, push the raised, positive end into the flat side of the compartment. For a 9-Volt battery, hold it at a 30° angle to line it up with the connector snaps.

How do you install a 9v battery?

Hold the battery at a 30° angle and slide the connector side in first. Once you've lined up the snaps, tilt the 9V battery slightly. Push the top of the battery in until the snaps are touching, then press down on the battery so that it snaps into place.

How do you put a battery in a car?

Installing the negative end first allows the battery to slide into the compartment more easily. Just push the flat end of the battery into the spring or lever, flattening it down. Then simply snap the positive, or raised, end into place against the flat side of the compartment.

Buy the correct replacement battery. Take a picture of or write down any information on the old battery, such as the size, dimensions, and part number. Head to an auto parts store and give the clerk this information as well as the year, make, model, and engine ...
