

Where can electrical panels be located?

In summary, electrical panels can be located anywhere other than in bathrooms, clothes closets, above steps of a stairway or in fire-rated partitions or area separation walls as long as the proper working clearances are provided per NEC 110.26, and the enclosure type is suitable for the application (i.e. NEMA 3R if exposed to weather).

Where is the main panel?

As a way to narrow down your hunt, the main panel will most likely be found in a closet, basement, garage, laundry room, or even outside-- somewhere out of sight, out of mind. It's a bit of an eye sore, usually a large metal box looking thing affixed to the wall. Which is probably why it's hidden.

Where should an electrical panel be placed?

When deciding where to position your electrical panel, you would want it to be accessible. Some people prefer the box fitted out of sight, especially in a home. The best location for the electrical panel is a large space that meets the working space guidelines from the NEC. It should also be out of sight with easy access.

Where are electrical panelboards installed?

In residential installations it is not typical for a space to be dedicated for the installation of an electrical panel. Panelboards are thus often installed in garages or basements in single family homes. In apartments or condos the panels are often installed in bedrooms or halls.

Can electrical panels be located behind doors?

So, as long as there is adequate space in the panel region, electrical panels can be located behind doors. The National Electric Code does allow for the placement of breaker boxes behind doors. However, the code states that there should be adequate working space, and nothing should be blocking the panel.

How do you find an electrical panel?

Locate your electrical panel when it's light outside or when the lights are on. If you've never located your panel and the power goes out in the night, you will be hunting and fumbling with a flashlight. Go room to room and look for the large gray metal box.
