Where is the charging plug of the battery pack

YOUR POWER PACK 1) Connect Power Pack to the charger ensuring the correct connection port is used. The plug should fit securely in place.

Simply connect your portable USB battery to the USB cord (USB-A male) located inside of your SWISSGEAR product and then plug your electronic device into the exterior USB port (USB-A female) using your own USB charging cord.

To ensure compatibility of your battery pack with French charging standards, you should verify the voltage, plug type, charging protocol, and safety certifications relevant to the region. First, verifying voltage is crucial because France operates on a standard voltage of 230V and a frequency of 50Hz.

How Cells Form Battery Packs . The cells are arranged as modules and then interconnected to form a battery pack as shown in Figure 1. In most cases, the voltage across the interconnected series of cells is considered as a measure for detecting the SoC. Figure 1. Battery packs are formed by combining individual cells.
