

Based on thousands of quotes from the EnergySage Marketplace, the average home ground-mounted solar panel system costs about \$60,200 before incentives. But because most homeowners qualify for the 30% federal tax credit, you should expect to only pay \$42,140 upfront. Interest rates will increase the price tag if you choose to finance your system with a loan.

Michigan homeowners' associations could not prohibit residents from having electric vehicle equipment, clotheslines and energy-saving equipment such as rooftop solar panels under a bill that received final legislative approval Thursday.
